

MBS is a global IT outsourcing and consulting firm that connects people, strategic objectives and technology initiatives to optimize business performance.

MBS delivers world class technology monitoring, management, and maintenance services to Small and Mid-sized businesses (SMBs). Working with our clients we define a package of technical resources and remote monitoring & maintenance to provide a Service Level Agreement that meets the coverage and complexity requirements of their infrastructure. These tailored solutions enable our clients to save significantly on staffing costs while providing a stable and empowering computing environment.

The trained and certified professionals of Managed Business Solutions assist with infrastructure ranging from small Peer-to-Peer networks to complex and highly functional distributive computing environments. This personalized outsourced support offers significant cost savings over in-house staff while providing a broader base of technical expertise and 24/7 coverage.

Founded in 1993, MBS currently employs 250+ people with resources in North America, South America, and Europe. For more information about MBS, please call (719)314-3416 or visit www.mbshome.com.
